TABLE NOTES:

- 1) Allowable loads were derived from tests conducted in accordance with ASTM E1592 and ASTM E72.
- 2) Allowable loads are calculated with a factor of safety of 2.0 for bending and shear.
- **3)** Connection strengths reflect a standard fastener pattern (2) 1/4" 14 self drilling screw into minimum 14ga substrate. Other substrates must be designed separately.
- **4)** Fastener capacity is based on manufacturer pullout/pullover data and are calculated with a safety factor of 3.0.
- 5) Allowable loads assume a minimum bearing of 2".
- **6)** Thermal Effects were not considered in analysis.
- **7)** The structural capacity of the supporting members were not considered.
